

TBS91-2(EN) V2 2012-10-08

AC-FIX PRESS COMPACT 2

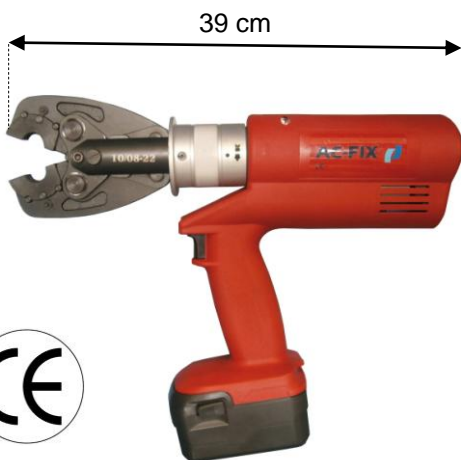

Pressing tool to assemble AC-FIX press fittings for PEX, PB and Multilayer pipes.

This handy and light tool with swivelling jaw can be used in different positions for the assembly of press fittings from DN12 to 32.

Standart set: Resistant plastic box with preformed foam containing pressing tool, 4 sets of inserts type "U" or "RF", battery and charger. Includes instructions and warranty certificate.

Warranty 1 year.

LI-ION BATTERY PRESSING TOOL

- Interchangeable "U" or "RF" inserts for DN 12, 16, 18, 20, 25 and 32 fittings.
- Li-Ion battery 12V 2,6Ah.
- Li-Ion battery with overheating and overload protection with temperature control (NTC).
- Battery charger AC 220/240V, DC 12 V, 50/60Hz, 36W (charging time: 60 min).
- Linear thrust : 20kN
- Electrical motor: 12V, 293W max.
- Total actual working weight (with clamp and battery included) just 4.3 kg.
- Total length only 39 cm. It can be used in small spaces and with one hand.
- Ideal distribution of the weight and ergonomic design: the handle in the centre of gravity allows an easy handling with one hand.
- Automatic piston return.
- Inserts made of hardened special steel in order to withstand heavy load and to increase the lifetime of the tool without wear of the pressing profile.
- Inserts with high dimensional precision machining.
- Individual serial number in the central block of the jaw that allows an accurate tracking of the guarantee.

(* Remark: The pressing tool AC-FIX PRESS COMPACT 2 can be used to press fittings from other manufacturers. To assemble fittings type TH, we have inserts type TH. Do not hesitate to ask us and we will inform you about the relevant testing or approvals.

CALIBRADOR PARA TUBO MULTICAPA - CHAMFERING AND CALIBRATING TOOL FOR MULTILAYER PIPES - CALIBREUR POUR TUBES MULTICOUCHE

Fabricado de acero inoxidable para minimizar su desgaste - Made of Stainless steel to increase its resistance - Fabriqué en acier inoxydable pour une plus longue durée de vie
 Asegura un calibrado óptimo: interior y exterior del tubo para que no se dañen las juntas tóricas cuando se inserte el accesorio dentro del tubo - Calibrates and chamfers: inside and outside the pipe in order to do not damage the O-Rings when inserting the fitting into - Calibre l'intérieur et l'extérieur du tube pour que les joints toriques ne soient pas endommagés au moment de l'introduction du raccord dans le tube
 Mango desmontable: se puede utilizar el mismo mango para todos los diámetros. - The same handle can be used for all the diameters - Le même manche peut être utilisé pour tous les diamètres
 Una vez desmontado el mango, se puede adaptar el cuerpo del calibrador, a herramientas eléctricas - Once the handle is disassembled, the body of the tool can be adapted to electric tools - Une fois le manche démonté, le corps de l'outil peut être adapté a des machines électriques
